Delgado, P. (2018). Kidney disease and the skin: The what, why, and how. PowerPoint presentation presented at National Kidney Foundation of Florida, Orlando, FL.

Delgado, P. (2017). Aggressive treatment of squamous cell carcinoma in a 53-year-old double lung transplant recipient patient: A case report. Unpublished DNP case report. University of Central Florida, Orlando, FL.

Delgado, P. (2015). Reducing body mass index with mindfulness. Unpublished MSN research Paper. University of Central Florida at Orlando, FL.

Delgado, P. (2014). Binge eating disorder and the relationship with obesity and hospital admissions. Unpublished MSN research paper. University of Central Florida at Orlando, FL.

CLINICAL TRIAL EXPERIENCE:

Principle Investigator:

1. A 5-year Longitudinal Observational Study of Patients Undergoing Therapy for Immune-Mediated Inflammatory Skin Conditions

Sub-Investigator:

1. A Phase 3 Randomized, Placebo-Controlled, Double-Blind Study to Evaluate Upadacitinib in Adolescent and Adult Subjects with Moderate to Severe Atopic Dermatitis
2. A Double-Blind, Placebo-Controlled Study of Cariprazine as an Adjunct to Antidepressants in the Treatment of Patients with Major Depressive Disorder who have had an Inadequate Response to Antidepressants Alone
3. A Phase 3, multicenter, randomized, double-blind, placebo-controlled, parallel-design study to assess the efficacy, safety, and tolerability of AVP-786 (deudextromethorphan hydrobromide [d6-DM]/quinidine sulfate [Q]) for the treatment of agitation in patients with dementia of the Alzheimer's type
4. Randomized, Double-Blind, Placebo-Controlled, Parallel-Group Study to Assess the Safety, Tolerability, and Efficacy of BIIB092 in Subjects with Mild Cognitive Impairment due to Alzheimer's Disease or with Mild Alzheimer's Disease.
5. A Randomized, Double-Blind, Placebo-Controlled, Parallel Group, Phase 2 Study to Evaluate the Safety and Efficacy of Avacopan in Subjects with Moderate to Severe Hidradenitis Suppurativa
6. Blood Sample Collection to Evaluate Biomarkers in Subjects with Untreated Melanoma

7. A Phase 3, Double-Blind, Randomized, Vehicle-Controlled, Efficacy and Safety Study of Ruxolitinib Cream Followed by an Extension Period in Participants With Vitiligo
8. A Double-Blind, Vehicle-Controlled, Randomized Withdrawal and Treatment Extension Study to Assess the Long-Term Efficacy and Safety of Ruxolitinib Cream in Participants With Vitiligo
9. A Randomized, Double-blind, Parallel-group Trial to Investigate the Safety and Efficacy of GWP42003-P Versus Placebo as Adjunctive Therapy in Participants with Schizophrenia Experiencing Inadequate Response to Ongoing Antipsychotic Treatment
10. A Phase 3, Double-Blind, Randomized, 8-Week, Vehicle-Controlled Efficacy and Safety Study of Ruxolitinib Cream Followed by a Long-Term Safety Extension Period in Adolescents and Adults With Atopic Dermatitis.
11. A randomized, double-blind, multicenter study assessing short (16 weeks) and long-term efficacy (up to 1 year), safety, and tolerability of 2 subcutaneous secukinumab dose regimens in adult patients with moderate to severe hidradenitis suppurativa (SUNRISE)
12. A randomized, double-blind, placebo-controlled multicenter dose-ranging study to assess the safety and efficacy of multiple oral ZPL389 doses in patients with moderate to severe atopic dermatitis (ZEST trial)
13. Split-face Study Determining the Cosmetic Efficacy and Tolerability of a new Topical Product for Treatment of Facial Skin Photoaging
14. An Open-label, 52-Week, Multicenter Trial Evaluating the Long-term Safety and Tolerability of Centanafadine Sustained-Release Tablets in Adults with Attention-Deficit/Hyperactivity Disorder
15. A Phase 2, Randomized, Double-Blind, Placebo-Controlled, Dose-Ranging Study of the Efficacy and Safety of INCB054707 in Participants With Hidradenitis Suppurativa.
16. A Phase 3b Randomized, Double-Blind, Double-Dummy, Active Controlled Multi-Center Study Assessing The Efficacy And Safety Of Abrocitinib Compared With Dupilumab In Adult Participants On Background Topical Therapy With Moderate To Severe Atopic Dermatitis
